

NCCS

Vision

Under the hood

The “Platform”

Launch plan

A tale of two NCCS's

- What has changed?
 - Design of an integrated system (harmonized, standardized)
 - Modern data infrastructure, built for scale
 - Open-source workflow, built for sustainability
- Improved user experience
- Expanded data catalog
- New website (“data platform”)
- A changing landscape: competitors, collaborations, opportunities and threats

<https://lecy.github.io/nccs/>

NOAA

**THE CLIMATE
CORPORATION**

NOAA

THE CLIMATE CORPORATION

Climate Corporation hopes to transform the weather business. By pairing the tools of agronomics and climatology with **the power of “big data,”** the company has managed to interpret weather information more fully than any other organization.

Company scientists process **fifty terabytes of weather information every day**, roughly the equivalent of ten million songs, including eight years’ worth of soil, moisture, and precipitation records for each of the twenty-nine million farm fields in the U.S.

The algorithm divides the country into nearly **half a million plots**, then **generates ten thousand daily weather scenarios** for each of them.

This information is used to create individualized insurance policies for corn, soybean, and wheat farmers covering major perils like drought, heat stress, and the risk of an early freeze. **No claims, forms, adjusters, or negotiations are required.**

NCCS IMPACT

- Data has tremendous value
 - We unlock that value when data is clean, well-documented, timely
 - Free data eliminates rent-seeking, forces innovation

NCCS IMPACT

- Data has tremendous **VALUE**
 - We unlock that value when data is clean, well-documented, timely
 - Free data eliminates rent-seeking, forces innovation
- We influence HOW people use data – **DISSEMINATION**
 - The new website is built for community and dissemination
- We can create **TOOLS** that provide insight
 - Climate Corporation example – what data driven management looks like
- We can help the sector develop **CAPACITY** to use data
 - Help nonprofits and foundations scale on the collection side
 - In a position to help them build their own capacity

NCCS IMPACT

AUDIENCES

- Data has tremendous value
 - **PHASE 1: Pay the Tech Debt** enabled, timely
 - Free data eliminates rent-seeking, forces innovation
- We can help the sector develop capacity to use data
 - **PHASE 2: Scale up** dissemination
 - **Build the Community**
- We can help the sector develop capacity to use data
 - **Define products** right
 - data driven management looks like
- We can help the sector develop capacity to use data
 - Help nonprofits and foundations scale on the collection side
 - In a position to help them build their own capacity

Wonks

**Community
partners**

seeds

“

Practical men who believe themselves to be quite exempt from any intellectual influence, are usually the slaves of some defunct economist.

Even madmen in authority who hear voices in the air are distilling their frenzy from some academic scribbler of a few years back.

— John Maynard Keynes

”

user experience

time from idea to insight:

the 10x goal

Human Service Nonprofits in 2010

Table 1: Nonprofit density and population measures in 2000 and from 2000-2010

	Min	Q25	Median	Mean	Q75	Max
Nonprofits Per 100k Residents in 2000						
All Subsectors	0	27.50	71.77	78.32	215.50	575.47
Change in Nonprofits Per 100k Residents 2000-2010						
All Subsectors	-20.71	17.69	26.96	29.15	37.75	171.02

- Step 01 - Create 2000 Census Dataset.R
- Step 02 - Create 2010 Census Dataset.R
- Step 02.01 - Map of Nonprofits by County.R
- Step 02.02 - Map of Nonprofits by County.R
- Step 02.03 - Map of Change 2000 to 2010.R
- Step 02.03 - Six Sectors by County.R
- Step 03 - Create Zipcode and MSA GeoID Dataset.R
- Step 04 - Create 2000 Nonprofit Subsector Datasets.R
- Step 05 - Create 2010 Nonprofit Subsector Datasets.R
- Step 06 - Create 2000 Religious Congregations Dataset.R
- Step 07 - Create 2010 Religious Congregations Dataset.R
- Step 08 - Merge 2000 Census NP and Congregation Data.R
- Step 09 - Merge 2010 Census NP and Congregation Data.R
- Step 09.98 - Add Distance to City Center Data.R
- Step 10 - Define 2000 Regression Variables.R
- Step 11 - Define 2010 Regression Variables.R
- Step 12 - Merge 2000 and 2010 Data.R

NTEE Code by Source - Nonprofit NTEE Code Finder

Classification by Focus Area and under the UN SDGs. Nonprofit EIN, **NTEE**, and UN SDG Classification. Ads Free Search Engine. Ideas and Funding. Free data intelligence. Tech for NPOs Marketplace. Types: Geographic Differences, Benchmarks by Org Size.

[Free Research and Reports](#) · [Free Interactive Reports](#) · [Systemic Problems](#) · [Tech Solutions](#)

The NTEE code is **a three-digit code that specifies an exempt organization's purpose.**

The National Center for Charitable Statistics (NCSS) developed the National Taxonomy of Exempt Entities (NTEE) coding system as a way to categorize nonprofit organizations.

The image shows a screenshot of the National Taxonomy of Exempt Entities (NTEE) coding system table. The table is organized into columns representing different categories of organizations, such as 'Arts, Culture, and Recreation', 'Education', 'Health, Safety, and Environment', 'Housing and Community Development', 'Public Safety', 'Social Services', 'Sports and Recreation', 'Terrorism Prevention', and 'Other'. Each category contains a list of NTEE codes and their corresponding descriptions. The table is a comprehensive reference for understanding the NTEE coding system.
